Fleet Reference Data Audit

Parts pricing, fluid specifications & service intervals — by make, model family and year range

Generated 07 July 2026 · Source: production Supabase (engine_families, fleet_vehicles, engine_family_fluids, service_schedule, fluid_pricing, ef_parts_data, tier_parts_reference, job_times_reference)

Makes covered	26
Engine families	130
Vehicle model/generation variants	427
Engine families with fluid spec data	115 / 130
Engine families with service-interval data	115 / 130
Vehicle-specific parts/labour price rows	229
Reference fluid products priced (oil/coolant/ATF/brake)	22
Generic tier parts-cost reference rows	52
Generic tier labour-hours reference rows	73

Scope note: this audit covers the engine-family reference layer (fluids, intervals, generic tier parts pricing) used to price customer jobs when a vehicle can't be matched to the older, sparser vehicle_models/parts_data tables. Coverage is deep for mainstream JDM/NZ-fleet Toyota, Honda, Nissan and Mazda engines and thinner for niche European and low-volume families, several of which (listed below) have engine specs but no seeded fluid/interval row yet.

Engine families with NO fluid/interval data seeded yet:
